

Foreign Private Investment in Nigeria – 2000

Statistical Services Division, Research Department CBN

The net flow of foreign investment into the Nigerian economy rose by 88 per cent to ₦3,347.0 million in 2000 from ₦1,779.1 million in 1999. The breakdown of the net flow positions revealed that contributions from companies of United States origin contributed to the bulk of the flow in the review period. The survey showed that the cumulative level of foreign direct investment in the country was ₦157,535.8 million, mainly through the shares of Mining and Quarrying as well as Manufacturing and Processing sub-sectors. The value of total stock of fixed assets in the review period was ₦297,989.7 million, indicating an increase of 0.2 per cent over the preceding year. The review further showed that, the cumulative reserves for depreciation of fixed assets rose from ₦94,013.0 million in 1999 to ₦95,452.7 million in 2000.

INTRODUCTION

The results of the annual foreign private investment survey conducted by the Central Bank of Nigeria in 2000 are presented in this report. The survey covered 156 establishments that are either fully foreign owned or are in partnership with Nigerians/Nigerian Agencies or enterprises doing business in Nigeria. Questionnaires were retrieved from 75 companies representing a response rate of 48.0 per cent. Statistical adjustments were however made for institutions that did not respond. The analysis of the survey returns are presented in eight parts. In Parts I, the flows of foreign investment by regions of origin, components and sectoral distributions are discussed. The cumulative and net foreign investment are analysed in Parts II and III, respectively. Part IV focuses on foreign investment in the Manufacturing and Processing sub-sector by industries and by regions. The cost and book values of the fixed assets of the establishments are examined in Part V, while the cumulative and current reserves for depreciation of these assets are presented in Part VI. The ownership structure and equity of the

companies are presented in Part VII, while Part VIII contains the summary of the report.

I. FLOW OF FOREIGN INVESTMENT.

The overall net flow of foreign private investment in Nigeria rose by 88 per cent from ₦1, 779.1 million in 1999 to ₦3, 347.0 million in the year 2000. Contribution of companies from the United States of America accounted for the bulk of ₦1, 855.6 million or 55.4 per cent of the total net flow, contrasting consecutive outflows of ₦868.4 million and ₦1, 489.4 million for 1998 and 1999 respectively.

Also, companies of Asian origin recorded an increase in net inflow from ₦61.2 million in 1999 to ₦185.8 million in 2000 representing 5.6 per cent of total net inflow. Companies from the United Kingdom had the least net inflow of ₦175.8 million or 5.3 per cent of the total net inflow in the review period. However, companies from Western Europe (excluding UK) recorded a net inflow of ₦907.7 million and other (unspecified) registered a net inflow of ₦222.1 million in the review period compared with ₦710.7 million in 1999. (Table1).

Components of Net Flow

A further breakdown revealed that the level of trade and suppliers credit as a component of net inflow rose sharply to ₦14, 169.3 million in the review period (Table 2).

The bulk of investment through this component is traceable largely to companies of the United States of America origin, which reversed its outflow of ₦135.3 million in 1999 to register an inflow of ₦14,103.7 million in 2000. However, the companies of Western Europe (excluding UK), which recorded ₦105.1 million through this component in 1999 registered a net outflow of ₦5.5 million during the review period.

The liabilities to head office component to net flow which recorded indebtedness of ₦1,122.5 million in 1999 increased further to ₦11,983.0 million in 2000 with companies of USA origin recording outflow of ₦12,248.1 million through this component. Only companies from Western Europe (excluding UK) and Asia recorded inflow through this component (liabilities to head office) from ₦249.9 million in 1999 to ₦268.7 million in 2000 and from an outflow of ₦30.9 million in 1999 to an inflow of ₦5.5 million in 2000 respectively. The contribution of unremitted profit component to net flow was still substantial although it declined from ₦2,719.9 million in 1999 to ₦1,293.2 million in 2000 with only the companies from Asia recording increase from ₦236.0 million in 1999 to ₦248.7 million in

2000. The result of the survey showed that the changes in foreign share capital, recorded an inflow of ₦143.9 million in the review period which is a decline from the inflow of ₦377.8 million in 1999. Other foreign liabilities component of the investment recorded successive outflows of ₦119.7 million in 1999 and ₦276.4 million in 2000.

Annual Flow of Foreign Private Capital

The annual flow of foreign private capital is analysed further into seven economic sectors/sub-sectors according to the components of net capital flow and regions of origin. The economic sectors/sub-sectors considered are: Mining and Quarrying; Manufacturing and Processing; Agriculture, Forestry and Fisheries; and Transport and Communication. Others are Building and Construction activities; Trading and Business services and miscellaneous activities.

The Mining and Quarrying sector recorded the largest net inflow in the review period. It registered a net inflow of ₦1, 855.5 million or 55.4 per cent of total net inflow. The main investment component that contributed to this sector's inflow was trade and suppliers credit from companies of USA origin to the tune of ₦14, 103.7 million. The Manufacturing and Processing sector recorded the second largest net inflow, which amounted to ₦1, 051.5 million in 2000. The bulk of the inflow (₦578.0 million) came through unremitted profits by companies of Western Europe (excluding UK). The trading and business services sector reported net inflow of ₦274.9 million during the period. The substantial inflow of ₦221.2 million to the sector came through unremitted profits by companies of Western Europe (excluding UK) backed by ₦52.1 million from Asian companies and ₦1.5 million from UK companies. A net inflow of ₦137.9 million recorded in the miscellaneous economic activity sector was traceable to companies of Western Europe (excluding UK) largely through liabilities to head office and unremitted profits with back up from UK companies through unremitted profits and change in foreign share capital. A net inflow of ₦27.3 million registered in the Agriculture-Forestry and Fisheries sector was attributed to companies of UK region through changes in foreign share capital and unremitted profits. (Table 3).

II. CUMULATIVE FOREIGN INVESTMENT.

Cumulative foreign investment in the country in the review period as derived from Tables 2 and 3 is analysed under two headings. These are: paid-up capital

plus reserve (comprising of unremitted profits and change in foreign share capital) and other liabilities (comprising of trade and suppliers credit, other foreign liabilities and liabilities to head office).

Regional Aggregates

In 2000, cumulative foreign private investment in Nigeria was ₦157,536.8 million, representing an increase of 2.2 per cent over the level in the preceding year (Table 4). Companies from Western Europe (excluding UK) maintained their lead in terms of shares, which however, declined slightly to 53.6 per cent in 2000 from 54.0 and 54.2 per cent in 1998 and 1999 respectively. The shares of companies from UK also declined slightly from 21.1 in 1999 to 20.8 per cent in the review period. However, the shares of investment of companies of United States and Asia increased from 13.0 and 2.3 per cent in 1999 to 13.9 and 2.4 per cent in 2000 respectively. Share of investment from others (unspecified) remained at 9.3 per cent as was the case in 1999. While the aggregate paid-up capital plus reserves rose to ₦74, 991.6 million from ₦73,554.7 million in 1999, other liabilities increased from ₦80, 633.9 million in 1999 to ₦82, 543.8 million in 2000. The contribution of companies of Western Europe (excluding UK) accounted for 43.9 and 62.4 per cent of aggregate paid up capital plus reserves and other liabilities groupings, respectively in 2000. The level of paid-up capital plus reserves and other liabilities of establishments of the UK origin were ₦18, 130.1 million and ₦14, 649.2 million representing 24.2 and 17.7 per cent of the total in each category (Table4).

Sectoral Aggregate

The cumulative levels of foreign investment in 2000 was obtained through the addition of the net positions for the review period for each of the major categories; paid-up capital plus reserves and other liabilities to the stock level of 1999. Analysis of the data shows that three sectors/sub-sectors namely: Agriculture-Forestry and Fisheries; Transport and Communication; and Building and Construction registered the same cumulative foreign investment in 2000 as in previous year. The cumulative level of investment in Mining and Quarrying; Manufacturing and Processing; Trading and Business Services and other miscellaneous activity sectors/sub-sectors increased by 3.2, 2.9, 2.5 and 0.3 per cent respectively in 2000 over the preceding year's level. Of the total (₦157, 536.8 million) cumulative foreign private investment in 2000, the share of Manufacturing and Processing, Mining and Quarrying sectors/sub-sectors rose from 22.6 and 38.2 per cents in 1999 to 23.5 and 38.5 per cents respectively in the review period. However, the share of cumulative investment in

Building and Construction and miscellaneous activity sectors/sub-sectors declined to 2.5 and 26.8 percents in 2000 from 2.6 and 27.3 percents respectively in 1999 (Table 5).

Maturity Pattern of Other Liabilities

In the review period, the level of total liabilities for overseas concerns by foreign companies operating in Nigeria was ₦83, 111.2 million, representing an increase of 1.1 per cent over the level in 1999 (Table 6). These liabilities were disaggregated into current and long-term liabilities. Indebtedness up to one year from trade creditors are regarded as short-term or current liabilities, while those exceeding one year, comprising other liabilities and liabilities to head offices are regarded as long term liabilities. The slight change in the level of cumulative liabilities was traceable to the net inflows recorded through long-term liabilities, which increased from ₦124, 857.4 million in 1999 to ₦125, 033.6 million in 2000, while net out payments on current liabilities reduced to ₦41, 922.4 million from ₦42, 651.0 million recorded in the previous year. Other liabilities of companies of United States of America origin rose from ₦20, 060.3 million to ₦21, 151.8 million in 2000 from the previous year's figure; while the other liabilities of companies of UK and Western Europe (excluding UK) origin recorded marginal increases. Companies of Asian origin registered a decline and companies of other (unspecified) origin recorded an increase in net out payment of ₦5, 872.7 million in the review period from the ₦5, 724.2 million in 1999. The total cumulative liabilities of Mining and Quarrying, Building and Construction and Trading and Business Services increased slightly while those of Agriculture-Forestry and Fisheries and Transport and Communication remained the same as 1999 figures, in the review period. The total cumulative liabilities of miscellaneous activity sectors declined marginally representing 28.2 per cent of the total cumulative liabilities in 2000. Firms from others (unspecified) and Western Europe (excluding UK) regions were responsible for the rest out payments of ₦1, 667.0 million recorded in the Manufacturing and Processing sub-sector in the review period.

III. NET INVESTMENT

Sectoral and Regional Distribution

As previously defined, paid up capital plus reserves comprise unremitted profits and changes in foreign share capital; other liabilities consist of trade and suppliers credit, other foreign liabilities and liabilities to the head office. This segment

examines net foreign investments flow positions by regions and economic sectors based on paid-up capital plus reserves and other liabilities. A net inflow of ₦3,347.0 million of foreign investment into the country in 2000 came largely through other liabilities, which constituted 57.1 per cent. Companies from the United States of America and Asia recorded increases in net inflow in 2000 from the previous year, with the former overturning an outflow of ₦1,489.4 million in 1999 to an inflow of ₦1,855.5 million in the review period. Companies of United Kingdom, Western Europe (excluding UK) and others (unspecified) regions recorded declines in net inflows, registering ₦175.7, ₦907.7 and ₦222.0 million respectively in 2000 against ₦1,235.7, ₦1,261.0 and ₦710.8 million in 1999 representing a decline of 85.8, 28.0 and 68.8 per cent respectively (Table 7). The Mining and Quarrying as well as Agriculture-Forestry and Fisheries sectors/sub-sectors recorded increases in their net inflows. In fact, the Mining and Quarrying sector/sub-sector over turned an out payment or outflow of ₦1,115.3 million in 1999 to an inflow of ₦1,855.5 million in 2000 while the net inflow in the Agriculture-Forestry and Fisheries sector/sub-sector rose to ₦27.3 million in 2000 from the zero level recorded the previous year. Every other sector/sub-sector of the economy recorded a decline in net inflow with Transport and Communication, and Building and Construction sectors/sub-sectors recording zero levels of flow against ₦130.7 million and ₦107.6 million recorded respectively in 1999. The entire net inflow in the Mining and Quarrying sector/sub-sector came through other liabilities from United States of America, while that of Agriculture-Forestry and Fisheries sector/sub-sector came through paid up capital plus reserves from companies of United Kingdom.

Maturity Pattern of Other Liabilities (Net)

A further breakdown of the net inflow of ₦1,909.7 million indicated for Other liabilities in Table 7 into current and long-term liabilities by economic sectors and regions is undertaken in Table 8. The results for 2000 showed that long-term liabilities recorded net inflow of ₦659.2 million, while current liabilities registered net inflow of ₦1,250.7 million representing 65.5 per cent of total foreign liabilities for the year. The entire region except Asia reported net inflows in foreign liabilities in the review period. Companies of USA origin engaged in mining and quarrying activities accounted for substantial net liability inflow, which came through current liabilities into the economy. Firms from other (unspecified) regions reversed the preceding year's outflow to register net inflow of ₦154.3 million mostly through long-term liabilities. The Mining and Quarrying and miscellaneous economic activities sectors/sub-sectors recorded net inflows mostly through current liabilities,

while the Manufacturing and Processing sectors/sub-sectors recorded net outflow for the review period. The companies of Asian origin in the Manufacturing and Processing sub-sectors reported substantial out payments in settlement of current indebtedness resulting in an increase in out payment from ₦91.7 million in 1999 to ₦187.2 million in 2000.

IV. FOREIGN INVESTMENT IN THE MANUFACTURING AND PROCESSING SUB-SECTOR.

The cumulative foreign private investment in the manufacturing and processing sub-sector is disaggregated into 28 individual groups shown in Table 9 based on the international standard of industrial classification (ISIC). Analysis of the groups is carried out under two investment components: paid up capital plus reserves and other liabilities. The level of cumulative foreign investment in the manufacturing and processing sub-sector increased to ₦37,665.1 million from ₦36,897.0 million in 1999. The proportion of paid-up capital plus reserves in total investment in the sector was 91 per cent compared with 90 per cent recorded in 1999. The increase in aggregate investment in this sector was due largely to developments in 11 industrial groupings, as levels of cumulative investment in 10 groups remained static while wearing apparel, furniture and fixtures, paper and paper product, and non-ferrous metals groups recorded divestments of ₦0.66 million, ₦2,398.6 million, ₦37.8 million and ₦225.2 million respectively during the review period. The cumulative investment level in the petroleum refineries group remained at ₦9,467.8 million, representing 25.1 per cent of aggregate cumulative foreign investment in the manufacturing sub-sector. The petroleum refineries are followed by food product groups with investment of ₦7,003.3 million or 18.6 per cent, while the textile product groups attracted ₦4,814.4 million or 12.8 per cent of total investment during the period.

Net Investment in Manufacturing and Processing Sub-Sector

Table 10 presents an analysis of net investment in the manufacturing and processing sub-sector industrial groups while a further break down of the same data by regions of origin are shown in Tables 11-15. Net flow of investment into the manufacturing and processing sub-sector declined from ₦2,309.3 million in 1999 to ₦768.2 million in 2000. Industrial chemicals, plastic products, pottery china and earthen wares and other manufacturing industries recorded net investment flows of ₦170.3, ₦115.3, ₦291.1 and ₦530.2 million, respectively; while paper

and miscellaneous petroleum and coal products registered divestment flows of ₦141.8 million and ₦288.9 million respectively during the review period (Table 10).

A further breakdown of the manufacturing and processing sub-sector shows that companies of UK origin recorded a vast decline in net inflow from ₦1,459.6 million in 1999 to ₦103.8 million in 2000. The decrease in net inflow resulted from the decline in both paid-up capital plus reserves and other liabilities from companies in the region. However, capital inflow through paid-up capital plus reserves in other manufacturing industries was ₦53.5 million representing 51.5 per cent of the total investment from the region in 2000 (Table 11). The companies of US origin recorded a net outflow of ₦152.2 million in 2000 as in the previous year through activities of paper industry. Both the paid-up capital plus reserves and other liabilities were outflows (Table 12). For companies of Western Europe (excluding the UK), capital inflow occurred in four industries, capital outflow in two, while others were static. Of the total inflow of ₦599.0 million, net inflow through activities of companies involved in pottery, china and earthenwares as well as other manufacturing industries accounted for ₦293.2 and ₦473.1 million representing 48.9 and 78.9 per cent respectively (Table 13). The value of investment by companies of Asian origin in the manufacturing sub-sector declined from ₦79.3 million in 1999 to ₦2.6 million in the review period. Although paid-up capital plus reserves increased, outpayment or outflow for other liabilities almost tripled. Companies of this region operating in plastic products and transport equipment record net inflow of ₦114.6 million and ₦119.5 million respectively (Table 14). Companies from Other (unspecified) regions recorded substantial net capital inflow of ₦215.0 million in 2000 from ₦12.5 million in 1999. Companies in industrial chemicals which recorded a net inflow of ₦163.3 million accounted for the increased net flow, while outflow of ₦9.0 million was recorded by miscellaneous petroleum and coal products in the review period (Table 15).

V. FIXED ASSETS

Fixed Assets (At Cost)

The flow of investments in fixed assets (at cost) is presented in Table 16, while Table 17 shows value of the total stock of fixed assets (at cost). The analyses in Table 17 are further disaggregated by regions in Tables 18-22. The fixed assets considered are Real Estate (Land and Building), Machinery and Equipment, Furniture and Fixtures, Motor Vehicles and Others (unspecified).

(a) Net Investment In Fixed Assets (At Cost)

Foreign owned companies in Nigeria added aggregate net fixed assets worth ₦1,622.0 million to the existing stock in the year 2000. Fixed assets worth ₦515.2 million were however retired during the year leaving a net accretion to stock of ₦1,106.7 million. A further analysis of the flow of fixed assets revealed that ₦783.6 million representing 70.8 per cent of the aggregate net accretion to stock of fixed assets occurred in the manufacturing and processing sub-sector. Analysis by components of fixed assets, Machinery and Equipment, Furniture and Fixtures and Motor Vehicles had net accretions to stock of fixed assets of ₦788.1, ₦236.8 and ₦124.8 million which represent 71.2, 21.4 and 11.3 per cent of aggregate net accretion respectively. Companies of Western Europe (excluding UK) in the manufacturing and processing and other miscellaneous economic activities sector/sub-sector accounted for 66.8 per cent of total addition to stock of fixed assets. The manufacturing and processing sub-sector contributed 70.8 per cent of fixed asset (at cost) (Table 16).

(b) Total Stock of Fixed Assets (At Cost)

The data on the stock of fixed assets (at cost) for all the sectors/sub-sectors and the regions are derived by adding the value of assets acquired less assets retired at cost for 1999 (Table 17). The value of total stock of fixed assets was ₦297,989.7 million in 2000, indicating an increase of 0.2 per cent over the preceding year's level. The slight increase being as a result of increase in every component of fixed assets except Others (unspecified). The stock of other (unspecified) assets declined from ₦62,205.0 million in 1999 to ₦62,178.1 million in 2000. Real Estate, Machinery and Equipment, Furniture and Fixtures and Motor Vehicles increased by 0.1, 0.5, 0.2 and 0.1 per cent respectively. On Sectorial basis, the Mining and Quarrying sub-sector accounted for the largest share of total fixed assets at cost with a value of ₦162,531.5 million or 54.5 per cent of the total fixed assets, followed by the Manufacturing and Processing sub-sectors, with 23.9 per cent, while the share of other sectors were Miscellaneous economic activities (10.4 per cent), Transport and Communications (4.8 per cent) and Trading and Business Services (4.2 per cent) (Table 17). Analysis by components of assets revealed that the stock of Machinery and Equipment, at cost, was ₦98,921.3 million or 33.2 per cent of total stock of fixed assets during the period, while Real Estate, Furniture and Fixtures, Motor Vehicles and Others (unspecified) assets recorded ₦54,436.4, ₦57,031.0, ₦25,422.9 and ₦62,178.1 million respectively.

(c) Value of Fixed Assets (At Cost) by Companies of UK Origin

In the review period, the total fixed assets, at cost, of companies of UK origin was ₦52,489.0 million, representing 17.6 per cent of the total stock value of fixed assets, at cost, compared with the 17.7 per cent recorded in 1999. The Manufacturing and Processing sub-sector accounted for 83.7 per cent of the total stock value of fixed assets during the review period. Other sectors: Agriculture, Forestry and Fisheries, Trading and Business Services and Miscellaneous had respective assets holdings of ₦143.9, ₦4,086.3 and ₦2,726.6 million. The value of fixed assets (at cost) in Mining and Quarrying, Transport and Communication and Building and Construction remained at their 1999 levels of ₦489.4, ₦73.4 and ₦1,045.6 million (Table 18).

(d) Value of Fixed Assets (At Cost) by Companies of US Origin

In the review period, the value of fixed assets at cost, of companies of US origin was ₦88,222.1 million representing 29.6 per cent of total fixed assets of foreign companies, almost the same with the 29.7 per cent recorded in 1999. The Mining and Quarrying sub-sector led other sectors in fixed assets valued at ₦54,280.0 million representing 61.5 per cent of total value of the fixed assets of companies of US origin. The miscellaneous economic activities sector, which recorded the same value of fixed asset in 1999 followed with ₦16,314.0 million or 18.5 per cent of total for firms from the region. Only Manufacturing and Processing and Mining and Quarrying sectors recorded improved assets holdings in the review period over their levels in 1999. Other sectors retained their preceding period values (Table 19).

(e) Value of Fixed Assets (At Cost) by Companies of Western Europe (excluding UK Origin)

The total value of fixed assets, at cost, of companies from Western Europe (excluding UK) rose marginally from ₦139,146.0 million in 1999 to ₦139,632.1 million in 2000. Also, the region's share of aggregate value of fixed assets, at cost for all the regions rose marginally from 46.8 per cent in 1999 to 46.9 per cent during the period under review. In terms of the shares of the region's fixed assets, Mining and Quarrying, Transportation & Communication and Building Materials & Construction recorded same levels as in 1999, while Manufacturing and Processing, Agriculture, Forestry and Fisheries; Trading and Business Services; and Miscellaneous recorded increases. (Table 20).

(f) Value of Fixed Assets (At Cost) by Companies of Asian Origin

The total value of fixed assets, at cost, for companies of Asian origin increased marginally from ₦4,712.3 million in 1999 to ₦4,764.0 million in 2000. Real Estate still recorded the highest value of ₦2,194.8 million, although a decline from the 1999 figure of ₦2,210.3 million. However, the value of fixed assets, at cost, in the region increased for the Manufacturing and Processing, Trading and Business Services and miscellaneous economic activities sectors/sub-sectors, while Transport and Communication and Building and Construction retained their preceding period values (Table 21).

(g) Value of Fixed Assets (At Cost) by Companies from Other (Unspecified) Regions

The total value of fixed assets (at cost) of ₦12,882.5 million, reported by companies of other (unspecified) regions indicated an increase of 0.7 per cent over the previous year's level. At ₦6,256.7 million, Manufacturing and Processing sub-sector accounted for 48.6 per cent of total assets acquired during the year. Manufacturing and Processing and Building and Construction recorded increases of 0.2 and 2.2 per cent respectively, in the value of their fixed assets. Value of assets of the miscellaneous economic activities sub-sector rose marginally to ₦4,193.0 million, while that of Mining and Quarrying, Agriculture, Forestry and Fisheries, Transport and Communication and Trading and Business services sub-sectors remained unchanged from the preceding period levels (Table 22).

V. FIXED ASSETS (AT BOOK VALUE)

The aggregate values of fixed assets (at book value) of enterprises covered in this survey are presented in Table 23, while Tables 24-28 show the breakdown on regional basis.

(a) Total Fixed Assets (At Book Value)

The book value of fixed assets held by foreign firms operating in Nigeria was ₦229,567.6 million in 2000, from ₦229,747.4 million in 1999. The book value of Machinery and Equipment remained the largest component of fixed assets, accounting for 30.8 per cent of the total, while Furniture and Fixtures, Real Estate, Motor Vehicles and other unspecified assets accounted for 22.1, 18.7, 5.5 and 23.0

per cent respectively. Analysis by sectors revealed that Mining and Quarrying registered the largest share (₦133,522.2 million), followed by Manufacturing and Processing (₦46,955.8 million) and Transport and Communication (₦25,380.6 million). The three sectors accounted for 89.7 per cent total book value of the fixed assets in 2000 (Table 23).

(b) Fixed Assets (At Book Value) by Companies of UK Origin

Fixed assets, at book value of companies of UK origin amounted to ₦50,167.2 million, representing a marginal increase over its level in 1999 (Table 24). The book value of Machinery and Equipment, which rose from ₦22,280.8 million in 1999 to ₦22,281.6 million, accounted for 44.4 per cent of the total. Other major contributors to the fixed assets, at book value, in the region were Furniture and Fixtures (17.0 per cent) and Real Estate (16.0 per cent). The bulk of fixed assets, at book value, to the UK companies valued at ₦32,721.6 million or 65.2 per cent of the total was employed in the Manufacturing and Processing sub-sector. Transport and Communication as well as Trading and Business Services sectors accounted for 27.8 and 6.5 per cent of the total, respectively. The value of fixed assets of Agriculture, Forestry and Fisheries increased over the level in 1999, while that of Mining and Quarrying, Transport and Communication and Building and Construction remained at their levels in the preceding period. Miscellaneous economic activities sector recorded negative book value of (₦752.1 million), indicating the use of obsolete assets.

(c) Fixed Assets (At Book Value) by Companies of US Origin

At ₦70,934.3 million, the book value of fixed assets belonging to companies of US origin recorded a marginal increase over its level in 1999 of ₦70,925.5 million. Only the Machinery and Equipment component of fixed assets recorded a marginal increase from ₦25,440.8 million to ₦25,450.1 million in 2000. Other components (except Motor Vehicles, and furniture and fixtures which recorded the same values as in (1999) registered minimal declines in fixed assets. The survey further revealed that fixed assets in the Mining and Quarrying sub-sector accounted for 74.1 per cent of the aggregate book value of fixed assets owned by companies of US origin. Apart from the Mining and Quarrying sub-sector, which recorded the largest increase, the Manufacturing and Processing sub-sector registered a marginal increase in fixed assets at book value. However, the book value of fixed assets of Agriculture, Forestry & Fisheries, Building and Construction, Trading and Business Services and miscellaneous economic activities sectors were the same

as those in 1999, while Transport and Communications sector maintained its negative book value of fixed assets since 1992, depicting assets obsolescence.

(d) Fixed Assets (At Book Value) of Companies of Western Europe (Excluding UK) Origin

A marginal decline was recorded in book value of fixed assets of companies from Western Europe (excluding UK) from ₦97,305.8 million in 1999 to ₦97,245.8 million in the review period. The Mining and Quarrying sub-sector still recorded the largest book value of assets of ₦80,499.1 million as in previous year but in terms of percentage of total value of fixed assets, it rose from 82.7 per cent to 82.8 per cent in the review period. The book value of assets in the Trading and Business Services sub-sector increased by 4.7 per cent to ₦1,187.2 million in 2000 from ₦1,133.9 million in 1999. The Manufacturing and Processing sub-sector recorded a decline, while other sectors recorded stagnant book value of assets. All the components of fixed assets except "Others" reflected increases in the book values of fixed assets in the region. The book value of others fixed assets fell to ₦33,353.8 million from ₦33,390.0 million in 1999. It however accounted for 34.3 per cent of the total, while the value of Real Estate, Machinery and Equipment, Furniture and Fixtures and Motor Vehicles component of fixed assets accounted for 30.2, 17.8, 16.4 and 1.3 per cent of the total book value of fixed assets in the region, respectively (Table 26).

(e) Fixed Assets (At Book Value) by Companies of Asian Origin

Fixed assets, at book value, by companies of Asian origin declined from ₦2,855.9 million to ₦2,679.5 million in 2000 (Table 27). The activities of the firms in the Manufacturing and Processing sub-sector accounted for the decline, as the book value of fixed assets in other sectors remained at previous year's levels, except for miscellaneous economic activities, which recorded a marginal increase of 0.25 per cent to register ₦899.2 million against the 1999 figure of ₦896.9 million and the trading and business services sector which recorded net increase in out payment (negative book value). However, the book value of Furniture and Fixtures increased by 64.1 per cent while that of Real Estate declined by 2.8 per cent but still returned the largest value of ₦1,919.0 million, representing 71.6 per cent of the total book value of fixed assets in the region.

(f) Fixed Assets (At Book Value) by Companies from “Others” (Unspecified) Countries/Regions

The book value of fixed assets of companies from other unspecified countries/region increased by 0.5 per cent to register ₦8,540.9 million. The book value of Machinery and Equipment, which accounted for 67.0 per cent of total book value of fixed assets in the region, increased by 0.3 per cent to ₦5,723.1 million. The sectoral analysis showed that fixed assets in the miscellaneous economic activities sector increased marginally from ₦2,662.2 million to ₦2,709.6 million, while that of Manufacturing and Processing sector declined from ₦4,382.0 million, to ₦4,377.2 million, representing 51.3 per cent of total fixed asset at book value from this region in the review period. However, the book values of all other sectors were the same as the previous year’s level, except for Building and Construction sub-sector, which reduced its negative book value (out payment) (Table 28).

VI. RESERVES FOR DEPRECIATION.

Cumulative reserves for depreciation increased by 1.5 per cent to ₦95,452,671.0 million from ₦94,012,971.0 million in 1999. The increase was shared by all the components of fixed assets except “Others” which registered a decline in the review period. Machinery and Equipment accounted for the largest share of 40.7 per cent of the total. The ratio of cumulative reserves for depreciation to the value of fixed assets, at cost, declined from 31.6 per cent in 1999 to 3.2 per cent, indicating that less assets were being acquired by foreign companies at rates lower than the existing ones were written off. A sectoral analysis revealed that the cumulative depreciation in all the sectors increased except in the Transport and Communications sub-sector. Mining and Quarrying and Manufacturing and Processing sectors accounted for 40.9 and 27.9 per cent of the total cumulative depreciation, respectively (Table 29).

(a) Current Reserves for Depreciation

The amount of current reserves for depreciation decreased from ₦7,685.7 million in 1999 to ₦1,439.7 million in 2000. The decrease was attributed to all the components of fixed assets except Furniture and Fixtures for which reserves increased from ₦576.9 million in 1999 to ₦833.7 million in 2000. Sectoral analysis showed that the Manufacturing and Processing sub-sector recorded the largest reserves for depreciation of ₦1332.2 million, representing 92.2 per cent of the

total reserves for all the sectors. Only the Agriculture, Forestry and Fishery sub-sector recorded an increase in current reserves for depreciation as every other sectors recorded decreases from their respective level in 1999. This sector overturned an out payment of ₦2.0million to record an inflow of ₦ 0.09million. The Transport and Communication sub-sector recorded zero returns (Table 30).

(b) Current Depreciation as Percentage of Fixed Assets (At Cost)

The proportion of current reserves for depreciation to the value (at cost) of fixed assets decreased to 0.5 per cent from 2.6 per cent in 1999. The miscellaneous economic activities and building and construction sectors were mainly responsible for this decrease as their proportions declined from 14.5 to 0.2 per cent and 9.6 to 0.1 per cent in the review period. A dis-aggregation by components of assets revealed that the proportions stood at 0.2, 0.5, 1.5, 0.1 and 0.1 per cents for Real Estate, Machinery and Equipment, Furniture and Fixtures, Motor Vehicles and others (unspecified) fixed assets respectively. Only the furniture and fixtures component registered an increase. (Table 31).

VII. OWNERSHIP STRUCTURE AND EQUITY

(a) Cumulative Share Capital

The survey revealed that the cumulative paid-up capital (excluding reserves or unremitted profits) in all foreign-owned or joint venture companies operating in Nigeria increased from ₦64,718.2 million in 1999 to ₦64,727.6 million in 2000, indicating an increase of 0.5 per cent over the preceding year's level. Common stock held locally by Nigerian investors amounted to ₦45,012.4million and accounted for 99.95 per cent of the total share capital (Table 32). Aggregate foreign share capital was valued at ₦19,693.3 million in 2000, representing 30.4 per cent of the total share capital, as against ₦19,685.0 million or 31.2 per cent of the total share capital in 1999. The observed increase in foreign share capital was due to fresh capital injected into Manufacturing and Processing, Building and Construction, Trading and Business Services and Miscellaneous sectors. The major shares were in Manufacturing and Processing, Mining and Quarrying and miscellaneous economic activities. The share of non-resident shareholders in total foreign share capital remained at 7 per cent, its level since 1995.

(b) Component of Changes in Foreign Share Capital

A further dis-aggregation of changes in foreign share capital revealed that expatriate's equity decreased by 98.4 per cent to ₦14.9 million in 2000, from ₦913.9 million in 1999 (Table 33). The decrease was attributed to the decline in both parent/affiliate and non-resident investors from ₦879.8 million and ₦34.1 million in 1999 to ₦12.8 million and ₦0.8 million in the review period. Sectoral analysis showed that the entire new capital was injected into the Manufacturing and Processing sub-sector as other sub-sectors recorded zero returns (Table 33).

VIII. SUMMARY AND CONCLUSION

The net flow of foreign private investment in Nigeria in 2000 was ₦3,347.0 million. The component of the net capital inflow showed that Trade and Suppliers credit mainly through companies of US origin accounted for the bulk of the inflow. The net inflow of companies in the region rose to ₦1,855.6 million from a net outflow of ₦1,489.4 million recorded in 1999. Total investment also increased for companies of Asian origin from ₦61.2 million to ₦185.8 million in the review period. The result of the CBN survey showed that the level of cumulative foreign private investment in the year 2000 was ₦157,536.8 million indicating an increase of 2.2 per cent over the level in 1999. The increase was reflected in the contribution of companies of U.S.A origin and Asia, whose shares increased from 13.0 and 2.3 per cents in 1999 to 13.9 and 2.4 per cents respectively in the review period. However, companies from Western Europe (excluding UK) maintained their lead, accounting for 53.6 per cent of the cumulative investment during the year 2000. Activities of foreign investors in Mining and Quarrying and Manufacturing and Processing sectors were intensified during the period. The share of aggregate investment in the sector increased from 38.2 and 22.6 per cent in 1999 to 38.5 and 23.5 per cent respectively. The cumulative foreign debt profile of foreign establishments operating in Nigeria grew further to ₦83,111.2 million from ₦82,206.4 million in 1999, owing to the increased long-term liabilities. Cumulative foreign investment in the Manufacturing and Processing sub-sector increased by 2.1 per cent over the ₦36,897.0 million recorded in 1999. The increase resulted from appreciation registered in paid-up capital. Net investment in fixed asset (at cost) in 2000 was ₦1,106.8 million. Mining and quarrying, Manufacturing and Processing and miscellaneous activities together accounted for 90.0 per cent of new fixed assets acquired during the period under review. The value of total stock

of fixed assets at cost, increased by 0.22 per cent to ₦297,989.7 million, while the book value dropped by 0.08 per cent to ₦229,567.6 million in 2000. The result of the survey showed that cumulative reserves for depreciation rose from ₦94,013.0 million in 1999 to ₦95,452.7 million in 2000. Similarly the exercise revealed that the cumulative paid-up capital (excluding reserves or unremitted profits) in all foreign-owned or joint venture companies operating in Nigeria increased from ₦63,140.0 million in 1999 to ₦64,727.6 million in 2000, indicating an increase of 2.5 per cent over the figure in the preceding period.
